Responsibilities:

- Developed comprehensive test plans for web and mobile applications, ensuring all project objectives were clearly defined and met.
- Identified defects within the production process, collaborating closely with development teams to prioritize and address issues promptly.
- Successfully tested software using Agile methodologies and SDLC (Software Development Lifecycle)
- Investigated customer complaints and product issues quickly resolving to enhance customer satisfaction

Internship and Certifications

Newton School | Full Stack / Java Development

July 2023 - Present

Learning an intensive certification course in Full Stack Development, equipping me with comprehensive knowledge and practical skills in both front-end and back-end technologies.

Projects

Meal Planner App | Self project ([link](#))

August 2023 - August 2023

The NutriPlan Meal Planner App, crafted using HTML, CSS, and JavaScript, is your personal nutrition guide. Input your height, weight, age, gender, and activity level, and let it generate customized breakfast, lunch, and dinner meal plans to meet your unique health and fitness goals. For those curious about what's on the menu, a simple click reveals detailed recipes for each meal, making healthy eating a delightful and hassle-free experience.

My Word Dictionary App | Self Project ([link](#))

July 2023 - July 2023

MyWord Dictionary App is a versatile and user-friendly dictionary application built with HTML, CSS and JavaScript. This app allows users to instantly access word definitions, listen to pronunciation, and save their search history. An integrated word processing API ensures that users have up-to-date and accurate information at their fingertips. The app's local storage feature allows users to revisit previous keyword searches even when offline. The app's intuitive interface and cross-platform compatibility make it a valuable tool for language enthusiasts and students.

News App | Personal project

July 2023 - July 2023

The News App is a web-based application that provides users with access to real-time news articles from various sources around the world. It leverages a third-party news API to fetch and display the latest headlines, articles, and news categories. This application aims to keep users informed about current events and trending topics conveniently in one place.
